Company Profile

*Crosible leads in innovation, quality service and technical expertise.
We are committed to provide effective solutions to the problems posed
by today's sophisticated filtration installations*

Crosible South Africa was established in 1996 and are market leaders in providing filtration solutions to industry.

All our filter cloths and dust bags are manufactured at our in-house factory in Tarlton, Gauteng, South Africa.

All cloths and bags are manufactured under strict quality control procedures and all cloths are woven to ISO 9002 specifications.

Crosible is the only filtration company to offer an after hour manufacturing service for emergency breakdown situations

Mission:

- To develop and produce filter products to meet the clients exact requirements.
- To provide the filtration industry with innovative technical expertise and value added service.

Goals:

- To ensure that all manufacturing meets the strictest quality control measures
- To maintain inventory standards which will meet delivery requirements
- To utilise sophisticated machinery to ensure consistent quality
- To provide specialised support by developing highly trained staff

Supplying Filtration Solutions to Industry
