## MULTI HEAD BORING MACHINE

The FM-445 Multi Head Boring Machine is constructed of heavy steel weldment and is hydraulically operated. The machine has a 1HP motor on each spindle. Drills are fully adjustable vertically and horizontally. Each spindle head can be easily adapted to fixed center boring head unit or an adjustable center boring head unit. Standard table size is 24 x 72 and table movement is from 0 to 8 . Our standard FM-445 has six boring heads, but this machine is available with as many heads as customer specifications require.

### Specifications:
