

Injection Molded UHMW Components

UHMW unique properties offer:

- Excellent abrasion resistance
- Excellent Glide properties
- Self-lubricating (no slip)
- High notched impact strength
- Outstanding low temperature properties
- Very good chemical resistance
- Excellent sound deadening properties
- Low density providing low cost
- FDA Compliant

The Ensinger-Putnam Advantage

As part of the Ensinger Family of companies, we have a deep experience base with a wide range of materials and processes to meet the needs of any application. To learn more about injection molding with UHMW, contact Christine Campbell directly at
